

Training Certificate

Operation of Water Jet Sweden Machine

Phil Harrison

Of

Specialised Engineering Products Ltd

Has received training in operation for water jet cutting machine 95626, as per the training manual, manufactured by Water Jet Sweden and also the HP pump. The training has lasted for 2 days and the following subjects have been taken:

- Health & Safety instructions
- Operation of Panel 1 control on NCX 30
- CNC codes
- High pressure equipment
- Service and maintenance of the machine
 - Cutting head
 - Tank agitation procedure
 - Warning signals
- General overview of HP pump system
- Maintenance of the HP pump
 - HP seal change
 - Dump valve change
 - Check valve maintenance
- Sand delivery & extraction

Operation of Water Jet Sweden Machine

Martin Dennis

Of

Specialised Engineering Products Ltd

Has received training in programming and operation for water jet cutting machines, as per the training manual, manufactured by Water Jet Sweden. The training has lasted for 5 days and the following subjects have been taken:

- Safety instructions
- Operation of Panel 1 control on NCX3020
- CNC codes
- High pressure equipment
- iGems programming
- Service and maintenance of the machine
 - Cutting head
 - Tank agitation procedure
 - Warning signals
- General overview of pump system
- Sand delivery & extraction

Programming of Water Jet Sweden machine

Phil Harrison
of
Specialised Engineering Products Ltd

Has received training in CAD/CAM programming for water jet cutting machines manufactured by Water Jet Sweden. The training has lasted for 1 day and the following subjects have been taken:

CAD/CAM Program IGEMS

- 2D CAD
- CAM 2D
- Nesting
- Cam Tools
- Sign Maker
- Data exchange Import
- CNC Codes
